

The FFI DataDepot is available for limited use. Many components are in development and will change over time. More thorough help materials will be provided as the user interface and functionality are finalized. For now, this guide should help you get started understanding the DataDepot.

Access to DataDepot through IFTDSS

Access for FFI is through the Interagency Fuel Treatment Decision Support System (IFTDSS). To check or set up IFTDSS access, go to <u>IFTDSS Home (firenet.gov)</u> and click on "Login":

You will be redirected to FAMAuth. Select "e-Authenticate" for government credential check.

If you do not already have an IFTDSS account, you will be instructed how to sign up from here.

Click the **Cycle** menu at the top, click **Monitoring** in the graphic then select **FEAT FIREMON INTEGRATED** (**FFI**) to open the FFI DataDepot.

DataDepot User Interface

Left Pane - Select the DataDepot function you want to use.

Right Pane - Select the desired report or the data to be included, depending on function.

Car DATADEPOT <	Summary Reports		
II. Reports	Report Name

	Cover Line Intercent	Cover Points	Cover Points Rv

Functions (Left Pane Options):

Reports – Create Summary, Custom, or Quality Assurance reports.

NOTE: Currently, the Quality Assurance Reports include all records in the DataDepot. Custom reports are still under development.

Analysis Groups – Create a custom group of macroplots to include in a Summary or Custom

Help – Future home to online help

Select Data button-Select/filter data for reports and queries.

report.

Reports

Report Name – Type a report name in the field to filter available reports. All Summary Reports from FFI Desktop are included in the DataDepot.

View – Click View in the report tile to create a report.

Summary Reports			DL
Report Name			
Trees Summary Report	Trees By Species Summary Report	Trees By Species Variable Radius Summary Report	
VIEW	VIEW	VIEW	

English and Metric buttons - Switch from English to metric units using the.

Columns – Select columns to show or hide in the right pane.

Stratify – Stratify the data using Macroplot Purpose, Macroplot Type or User Variable fields available in the selected data.

NOTE: New variables for stratifying cannot be added in the DataDepot.

Download – Save a CSV file of the full Summary or Custom Report.

Summary Repo	rts			
Trees			🔟 COLUMNS 📚 STRAT	IFY 🕁 DOWNLOAD
Organization Name	Database Name	Adminunit	Projectunit Name	Macroplot Name
CalcTest	DO NOT CHANGE P	Report 1 Seb Woods State Park	Dvlan Creek Rx	DvlanCkRx01

NOTE: See the <u>Select Data</u> section if you want to limit the Summary Report data to a specific Admin Unit and Project Unit or a custom selection of Macroplots.

Analysis Groups – Create a group of selected Macroplots to be include in a summary report.

Organization – Select an Organization to filter available Analysis Groups.

Filter – type text to filter existing Analysis Groups.

Analysis Groups

ORGANIZATION	ANALYSIS GROUP

Organization tab – Used to select the data included in Summary and Custom reports.

NOTE: Currently, only one Organization, Admin Unit, or Project Unit can be selected at a time. Use the Analysis Groups feature to include data from multiple Organizations, Admin Units, or Project Units.

Organization

Click a row in the data grid to select the Organization that includes the data you want to include in a report.

Admin Unit

- General Click on Admin Unit or click Next to see Admin Units
- Click a row in the data grid to select the Admin Unit data.

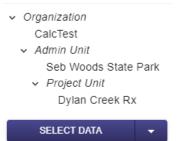

Project

- Click on Project Unit or click Next to see Project Units
- Click a row in the data grid to select the Project Unit
- Click SAVE SELECTED DATA!

The screenshot shows *CalcTest, Seb Woods State Park* and *Dylan Creek Rx* selected as the **Organization**, **Admin Unit** and **Project Unit**, respectively.

ORGANIZATION ANALYSIS GROUP		() SAVE SELECTED DATA CANCEL
å 	_ A	A
Organization 🗙	Admin Unit $ imes$	Project Unit ×
CalcTest	Seb Woods State Park	Dylan Creek Rx

The data selection is displayed in the lower part of the left pane.

The data selection persists for all Summary and Custom reports until it is changed or cleared.

Analysis Group tab – Select a previously created custom group of *Macroplots* to include in Summary

or Custom Reports.

NOTE: See the <u>Analysis Groups</u> section if you want to create a custom group of Macroplots to include in reports.

Organization – Select an Organization to filter available Analysis Groups.

Filter – type text to filter available Analysis Groups (filtering is case sensitive)

- Click the desired Analysis Group
- Click SAVE SELECTED DATA!
